Personal Project

Professional CV Mobile Application (React Native, Expo)

- What: Single cross-platform portfolio for Wiehan van Staden.
- Tech: Expo + React Native + TypeScript, component-driven.
- Result: One repo for web/mobile, reusable UI, faster iteration.

Professional CV Website (Angular, Typscript, css)

- Built an SEO-optimized portfolio SPA using Angular 19 with Angular Universal (SSR) to improve indexability and first contentful paint.
- Implemented server-side rendering and prerendering with Express to serve static assets and deploy as a Node service.
- Designed a responsive UI using Bootstrap and ngx-bootstrap.
- Structured SSR-safe architecture (ServerModule, provideServerRendering) and handled browser/server context separation.
- Centralized project data in a dedicated service to enable future API integration.
- Achieved improved Lighthouse performance and SEO readiness through pre-rendered pages and optimized routing.
